

### In the Box:

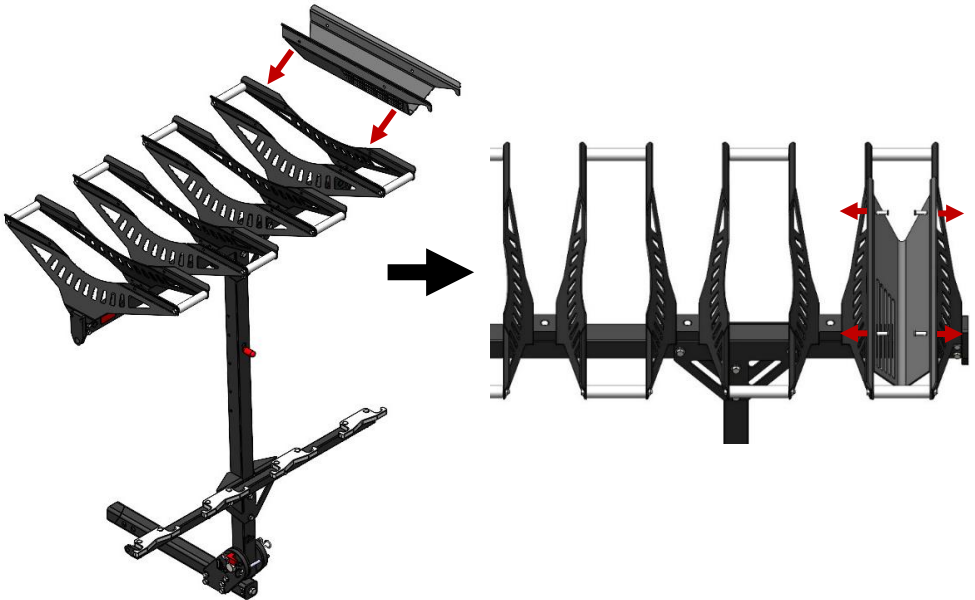

- 1) Kids Basket
- 2) Riser Spools
- 3) Hardware Packet

### Tools Required:

- 1) 9/16" Wrench

### Kids Basket Installation

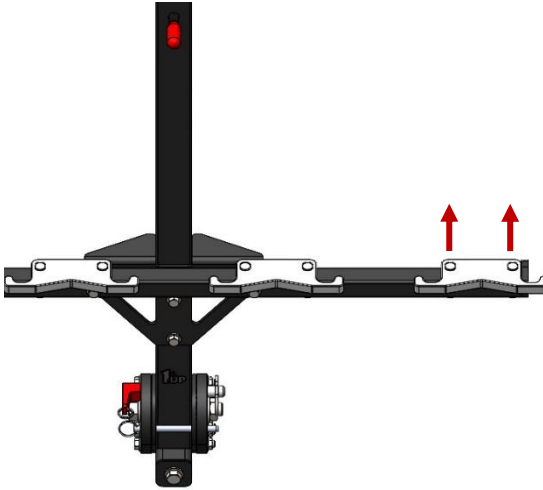

Standing at back of Recon Rack, position Kids Basket with hooks back, ensuring slotted section is facing to the driver's side. Insert Kids Basket from top of Recon Rack so that Kids Basket hooks sit on top of Recon Rack spool. Insert all four detent pins with head remaining inwards of Kids Basket.

# **Kids Bike Riser Installation**

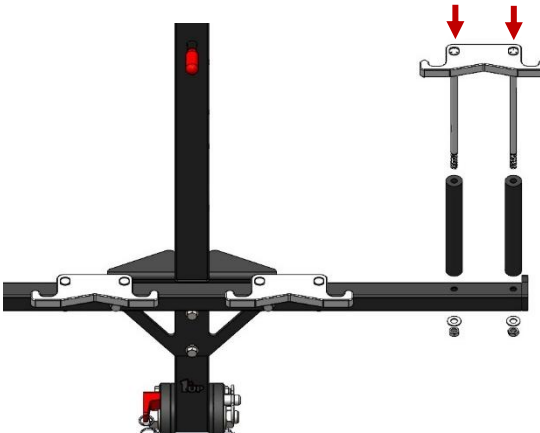

## **Step 1**

Remove Tire Catch directly below installed Kids Basket using 9/16" wrench.

## **Step 2**

Place new 9.25" length bolts through Tire Catch and Kids Riser spools as shown below. Install new Tire Catch assembly onto Lower Horizontal using washers and locking nuts, tighten securely using 9/16" wrench.

## **Product Notes**

- Kids Basket can be used in all basket positions
- Intended for 20 - 24" wheel sizes
